

## HAHN'S SODA EXPLOSION EXPERIMENT

In this activity, your child will do their very own soda explosion experiment just like the one from Hahn's lab! When we experience Jesus' love, we can't help but overflow with it and share it with others just like the soda overflows! Remember to have fun and keep a careful eye on your child and the experiment at all times.

### DIRECTIONS

1. Set the bottle of Diet Coke in a large bin.
2. Create a paper "funnel" by folding a piece of paper in half lengthwise.
3. Place the mint Mentos in a row in the fold of the paper funnel so that you may quickly funnel them into the Diet Coke bottle when it's time.
4. Unscrew the lid of the Diet Coke bottle.
5. Funnel the Mentos into the opening of the Diet Coke bottle, being careful to get all of them in the bottle quickly.
6. Stand back and watch the Diet Coke explosion!

### SUPPLIES NEEDED

1 Piece of  
paper

1 Liter of  
Diet Coke

1 Large bowl  
or bin

13 Mint  
Mentos

### TEACHING CONNECTION

Remember, science is powerful, but the Holy Spirit is so much more powerful! Because of the power of the Holy Spirit, we can share our love for Jesus with others!
