

Greetings from

HAHN'S LAB

Hello friend!

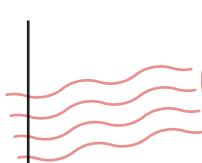

I hope you had a good week! Did you try doing any of my science experiments? I tried a new experiment today with some powerful chemicals. They were very powerful, but they are nothing like the power of the Holy Spirit!

I also heard the Bible story about one of Jesus' disciples named Philip. Philip did what God told him to do and helped the Ethiopian man know the Good News about Jesus.

When the Ethiopian man believed in Jesus, they both went down to some nearby water and Philip baptized him. Then something amazing happened! All of a sudden, the Spirit of the Lord took Philip away and he appeared in another town. The Ethiopian man never saw Philip again, but they both told other people about their love for Jesus.

Because of the power of the Holy Spirit, God helps us share our love for Jesus with others, too. Who is someone you can share about Jesus with?

Hahn
